

Reminder

Your new water meter is on its way!

PREPARE FOR INSTALLATION:

1. Make sure the property-side service line from the meter into your property is in good condition; you must fix any defective condition or leak before the meter replacement work can happen
2. Prune back any plant material that has grown over your current meter box

DURING INSTALLATION:

1. M&E Construction, the County's contracted meter installer, will be changing your meter
2. Your water service will likely be interrupted for 15 to 30 minutes
3. M&E will leave a door hanger on your door to let you know they were there and if they were able to change your meter

For meter installation questions, call M&E Construction at: (833) 626-3326.

For general questions about advanced meters, call FCDWS customer service at 770-781-2160.
