Periodic Methane Monitoring Report

2nd Quarter / 2024 Quarter or Month / Year

Facility Name:	Eagle Point Landfill	Date(s) of Monitoring: 4	16/2024
Facility Permit #'s:		Monitoring Conducted by:	l Services
Permit #'s (cont):	058-012D(MSWL)	Equipment Field Calibrated by:	M. Young
County (Location):	Forsyth	Date of Field Calibration:	4/16/2024
Monitoring Equipment:	RKI Eagle 2	Manufacturer Calibration/Service Date	4/1/2024

- 1. All reports must include a scaled and dated potentiometric surface map, (this applies only to those facilities required to perform groundwater monitoring) that shows ALL monitoring points, accompanied by a table listing the as-built depths and corresponding elevations of the bottoms of the methane monitoring wells and/or barhole punches. The potentiometric surface maps must be updated on an annual basis, signed & sealed by a qualified groundwater scientist. Those facilities that do not conduct groundwater monitoring should, at a minimum, include a site map that shows ALL monitoring locations.
- 2. All reports must specify whether each monitoring location is a structure, permanent well, barhole punch or vent (e.g. MM-1=scalehouse, MM-1=well, MM-1=BHP (barhole punch), MM-1=vent, or GWC-1=groundwater well).
